Dialysis Treatment Center – Ambulatory Care Facility

Code: 2018 Building Code   Date: September 5, 2018
Section: 422, 202, & 304

Question:
Is a dialysis treatment center considered a Group B (business) “Ambulatory Care Facility” by the code?

Answer:
Yes. Although some patients may be able to disconnect themselves from a dialysis machine in an emergency, most are incapable of self-preservation because the related disease has left them in a physically weak state or, they are incapable of understanding the instructions for safely and properly disconnecting themselves from the dialysis equipment. Since a dialysis patient is treated on a less than a 24-hour basis and may be rendered incapable of self-preservation during such treatment, such facilities meet the code definition for an “Ambulatory Care Facility”.
