Lockdown Hardware Operation

Code: 2012 Fire Prevention Code
Section: 404.2.3, 1010.1.9.5

Date: September 17, 2018

Code: 2018 Building Code
Section: 1010.1.9.5

Question:
Does the current NC Fire Code language, for the purposes of an emergency lockdown situation, allow for the utilization of more than one action or motion in order to open a door or door leaf?

Answer:
Yes. Lockdown situations, referenced in 404.2.3 of the Fire Prevention Code are emergency situations requiring that the occupants be sheltered and secured in place within a building when normal evacuation would put occupants at risk. Lockdown plans are implemented in situations where normal egress has been determined to be detrimental to the life or safety of the occupant. All lockdown plans shall be approved by the Fire Code Enforcement Official. This approval could include additional actions or motions in order to open a door or door leaf depending upon details specified in the lockdown plan and supersedes restrictions found in Section 1010.1.9.5 for single action unlatching of egress door hardware.

Keywords:
one action, locking, latching, door operation
