Glazing Labeling in Hazardous Locations

Code: 2018 NC Residential Code  Date: March 22, 2019
Section: R308.1

Question:
Is Section R308.1 referring to the glazing or the label being destroyed when removed?

Answer:
It is referring to the label itself and not the glazing. According to the 2015 IRC commentary, “A manufacturer can identify safety glazing with a removable paper designation, provided removal would destroy the designation. This ensures that the designation will not be applied to a noncomplying piece of glass”.

Keywords:
Tempered glass, spandrel glass
