

NC FIRE and RESCUE COMMISSION  
Firefighter Level I  
Practical Skill Scenarios

**1 of 17: LADDER / CARRIES**

**NFPA 1001, 5.3.6(b)**

**Performance Objectives:** The candidate, while wearing protective clothing, shall demonstrate a one-person low shoulder ladder carry using a single / wall ladder.

**Performance Evaluation:** The candidate, while wearing full protective clothing, shall correctly demonstrate the steps for picking up a single / wall, ladder (minimum 12 foot length) from the ground and carrying the ladder a prescribed distance (distance to be determined by evaluator).

**Instructor Statement:** While wearing full protective clothing, correctly demonstrate the steps for picking up a single / wall, ladder from the ground and carrying the ladder (distance to be determined by evaluator) using the low shoulder method.

**15 of 17: LADDER / BRINGING INJURED DOWN  
FACING THE LADDER**

**NFPA 1001, 5.3.9(b)**

**Performance Objective:** The candidate, wearing full protective clothing and provided with appropriate ladder and a victim, shall bring a simulated unconscious person down the ladder from a height of at least 20 feet. The victim shall weigh between 100-200 pounds. The victim will be positioned facing the ladder

**Objective Evaluation:** Secure a 24' extension ladder against a stable structure. Place a victim (in full PPE simulating to be unconscious) on the ladder at a height of approximately 20 feet. When the candidate ascends the ladder and reaches the victim, the candidate shall then descend with the victim in a manner described in the Essentials 4th edition (victim supported by knee and rescuer arms). A person should also be used to secure the ladder butt.

**Instructor Statement:** While wearing full protective clothing correctly safely climb a ladder and demonstrate a safe and controlled method for rescuing a victim from a ladder to include safely bringing them to the ground.

**Recommended Equipment List:**

**16 of 17: LADDER / BRINGING INJURED DOWN  
FACING THE RESCUER**

**NFPA 1001, 5.3.9(b)**

**Performance Objective:** The candidate, wearing full protective clothing and provided with appropriate ladder and a victim, shall bring a simulated unconscious person down the ladder from a height of at least 20 feet. The victim shall weigh between 100-200 pounds. The victim shall be positioned facing the rescuer.

**Objective Evaluation:** Secure a 24' extension ladder against a stable structure. Place a victim (in full PPE simulating to be unconscious) on the ladder at a height of approximately 20 feet. When the candidate ascends the ladder and reaches the victim, the candidate shall then descend with the victim in a manner described in the Essentials 4th edition (victim supported by knee and rescuer arms). A person should also be used to secure the ladder butt.

**Instructor Statement:** While wearing full protective clothing correctly safely climb a ladder and demonstrate a safe and controlled method for rescuing a victim from a ladder to include safely bringing them to the ground.
