Responding to Ethanol Incidents

Revised: March 2008 v. 7.21
Printed in the United States of America

The safety statements, procedures, and guidelines contained in this course manual are current as of the publication date. Prior to using the safety statements, procedures, and guidelines contained in the course manual, it is advised that you confirm the currency of these statements, procedures, and guidelines with the appropriate controlling authorities.

The development of this training program was supported by a grant awarded to the International Association of Fire Chiefs (IAFC) by the United States Fire Administration (USFA). The IAFC wishes to thank the USFA for its ongoing commitment to the health and safety of hazardous materials first responders.

The IAFC would also like to thank Captain Gary Pope (ret.), Captain Steve Hergenreter, and the Ethanol Emergency Response Coalition (EERC) for their assistance with the content development and program review.

Pictures on the cover are the property of the Texas Engineering Extension Service/Emergency Services Training Institute (TEEX/ESTI).
# Table of Contents

## Module 0: Introduction .................. 0-1
- About This Course ................................. 0-1
- Course Goal ..................................... 0-1
- Course Overview ................................ 0-1
- Target Audience ................................. 0-1
- Delivery Method .................................. 0-2
- Course Prerequisites ............................. 0-2
- Course Length .................................... 0-2

## Module 1: Ethanol and Ethanol-Blended Fuels ........................... 1-1
- Introduction ...................................... 1-3
- History of Ethanol-Blended Fuels .............. 1-4
- Common Ethanol-Blended Fuel Mixtures ....... 1-5

## Module 2: Chemical and Physical Characteristics of Ethanol and Hydrocarbon Fuels.... 2-1
- Introduction ...................................... 2-3
- Activity 2.1—Definitions ........................ 2-4
- Worksheet 2.1: Definitions ..................... 2-5
- Characteristics of Gasoline (A Hydrocarbon) .... 2-7
- Characteristics of Ethanol (A Polar Solvent) .... 2-7
- Activity 2.2—Comparison of Gasoline and Ethanol ........... 2-9
- Characteristics of Ethanol-Blended Fuels ....... 2-10

## Module 3: Transportation and Transfer of Ethanol-Blended Fuels .................. 3-1
- Introduction ...................................... 3-3
- Transportation and Placarding .................. 3-3
- Activity 3.1—Ethanol Spill Emergency ......... 3-9

## Module 4: Storage and Dispensing Locations................. 4-1
- Introduction ...................................... 4-3
- Terminal Storage of Ethanol-Blended Fuels .... 4-3
- Bulk Plant and Distribution Facilities .......... 4-5
- Retail Dispensing Stations ...................... 4-6
- Summary .......................................... 4-7
- Activity 4.1—Ethanol in Your Jurisdiction ...... 4-8
- Worksheet 4.1: Ethanol in Your Jurisdiction .... 4-9

## Module 5: Fire Fighting Foam Principles and Ethanol-Blended Fuel ..................... 5-1
- Introduction ...................................... 5-3
- Basic Foam Principles ............................ 5-3
- What is Foam? ..................................... 5-3
- Why Use Foam? .................................... 5-4
- How Foam Works ................................... 5-4
- What is Foam Not Effective On? ............... 5-5
- What is Foam Effective On? ..................... 5-6
- Foam Terminology ................................ 5-8
- Types of Foam ..................................... 5-8
- Foam Characteristics ............................. 5-9
- Foam Proportioning and Delivery Systems .... 5-10
- Application Techniques ......................... 5-16
- Foam and Ethanol and Ethanol-Fuel Blends ... 5-17
- Foam Recommendations for Fire Departments ... 5-18
- Summary .......................................... 5-19
- References ....................................... 5-21

## Module 6: Ethanol-Blended Fuel Emergencies ...... 6-1
- Introduction ...................................... 6-3
- Detection and Monitoring ....................... 6-3
- Personal Protective Equipment (PPE) .......... 6-4
Activity 6.1—Incident Procedures........ 6-6
    Worksheet 6.1: Non-Fire Spill
        and Leak
        Procedures .......... 6-7
    Worksheet 6.2: Fire Incident
        Procedures With
        Ethanol-Blended
        Fuel Spills............ 6-8

Summary ........................................................... 6-9

Module 7: Tank Farm and
Bulk Storage
Fire Incidents .......... 7-1

Introduction.................................................... 7-3
Tank Farm and Bulk Storage Fire Operations... 7-3
Preplanning ...................................................... 7-4
Summary ........................................................... 7-4
    Activity 7.1—Ethanol Emergency
        Procedures................................. 7-6

Introduction

About This Course

**Course Goal**
Upon the successful completion of this course, participants will have knowledge related to ethanol and ethanol-blended fuels, including their use, chemical and physical characteristics, transportation, and transfer.

**Course Overview**
Course topics include:

- Module 0: Introduction
- Module 1: Ethanol and Ethanol-Blended Fuels
- Module 2: Chemical and Physical Characteristics of Ethanol and Hydrocarbon Fuels
- Module 3: Transportation and Transfer of Ethanol-Blended Fuels
- Module 4: Storage and Dispensing Locations
- Module 5: Fire Fighting Foam Principles and Ethanol-Blended Fuel
- Module 6: Ethanol-Blended Fuel Emergencies
- Module 7: Tank Farm and Bulk Storage Fire Incidents

**Target Audience**
This course is designed for individuals who will respond to ethanol-related emergencies as well as those who work at fixed-facilities and transport fuel.
For additional information please visit the following Web sites:

• http://www.iafc.org/

• http://www.dtnethanolcenter.com

**Delivery Method**

Course delivery method consists of:

• lecture with PowerPoint presentations,

• case studies, and

• participant discussions.

**Course Prerequisites**

None

**Course Length**

6 hours
Instructors will use this portion of the course time to familiarize you with facility safety and convenience features as well as any additional resources or equipment available to you.
