Stair Riser Height Measurement at Thresholds

Code: 2012 Residential Code                  Date: July 2, 2012
Section: R311.7.4

Question:
If a stair leads up to a door that has a threshold, do you measure the riser height to the top of the threshold or to the finished floor height?

Answer:
Measure the rise from the stair step surface or landing surface (if any) to the top of the threshold.

Keywords:
Stairways, risers, garages, steps
